Projects –

1. **AI Powered – Universal Format Converter :** (Duration – 6 July 2025 – 10 October 2025)

I worked as the frontend developer for an *AI-Powered Universal Format Converter*, a web application capable of converting multiple file types using intelligent processing. I designed and developed the complete user interface using HTML, CSS, and JavaScript, ensuring a clean, responsive, and user-friendly experience. My work focused on creating smooth interactions for file uploads, format selection, and conversion flow, along with proper validation and feedback to the user. I also integrated the frontend with the Python Flask backend through API calls, enabling seamless communication for real-time AI-based file conversion.

2. **Car on Rent :** (Duration – 5 October 2024 – 10 October 2024)

Developed a comprehensive Java-based 'Car on Rent' system, enabling users to browse, book, and manage car rentals online, including features like vehicle search by location, date, and car type, real-time availability checks, payment integration, and detailed customer management, all within a user-friendly web interface, streamlining the car rental process for both customers and administrators."
